WORK EXPERIENCE

Frontend Developer – Hamro SAN Pvt. Ltd, Kathmandu

(April 2023 – August 2023)

- **Restaurant ERP and POS Software**
Developed and implemented a Restaurant ERP and POS software using Angular. Designed and integrated features for order management, inventory tracking, and sales reporting. Enhanced user experience with a responsive, intuitive UI and real-time data updates to streamline restaurant operations and improve service efficiency.

Frontend Developer – Annofi Technologies Pvt. Ltd, Lalitpur

(August 2023 – Present)

- **Dental Clinic Management Software**
Developed a comprehensive dental clinic management system using Angular, featuring patient record management, appointment scheduling, and a responsive user interface. Integrated secure data handling and real-time notifications to optimize clinic workflows and enhance patient care management.
- **Accounting Billing and Inventory System**
Created an integrated accounting and billing system using Angular, automating invoicing and financial reporting. Implemented inventory tracking and expense management features to provide real-time financial insights and streamline business operations.
- **Sales RM**
Contributed to the development of SalesRM, a sales and customer relationship management platform, focusing on lead tracking, Tour Program, Daily Call Reports, Doctor Chemist and Stockist Relationship, and performance analytics to support business growth.

PROJECTS

Ecommerce Store – React/ Redux + ASP.NET

The Ecommerce Store project built with React enables users to browse products, manage a shopping cart, and complete purchases. It includes features like user authentication, product filtering, and responsive design for a seamless shopping experience.

Admin Panel – Angular

The Angular Admin project involves creating a dashboard for managing and monitoring data, with features like user management, analytics, and CRUD operations. It includes a responsive design, role-based access control, and real-time data updates.

Inventory System – Spring Boot

Developed a robust inventory management system using Spring Boot, featuring product tracking, stock level monitoring, supplier management, and streamlined inventory operations.
